

## Figures/Preliminary Results:

**Figure 1.** SDS-PAGE gel of CcmF and CcmH. CcmF is purified via a 6xHis tag over TALON resin.

**Figure 2.** Preliminary cryo-EM screening images of CcmFH sample at ~1 mg/ml concentration, obtained by NCCAT on the Gaiatos instrument. Images represent the **A)** atlas **B)** grid and **C-F)** holes of one cryo-grid prepared at the UD workshop.
