

Fig. 1. Preliminary Cryo-EM Results. *Top*, FnBamA/Fab9 complex (150 kDa) showing a micrograph, 2D class averages, and the current state of the reconstruction. *Middle*, BAM Δ BamC (175 kDa) complex showing a micrograph, 2D class averages, and the current state of the reconstruction. *Bottom*, NgBAM complex (175 kDa) showing a micrograph, 2D class averages, and the current state of the reconstruction.
